International Automotive Components

International Automotive Components

When IAC chose Stanly County for consolidating their purchase of Collins & Aikman, the company had aggressive plans for expansion. As a major supplier to the automotive industry's carpeting products, IAC enjoys a tremendous market share. And as with most major manufacturers in the United States, the economic downturn hit IAC hard. Stanly County worked with IAC to modify their incentive agreement and find a solution that met the needs of the company and their desire to maintain operations in Stanly County.

Today, IAC continues to be one of the largest employers in Stanly County and has seen positive growth. By working with existing industries, Stanly County has proven itself to be truly business-friendly. The Stanly County EDC is committed to working with clients to find creative solutions to problems and connect our companies to the region, state and world.

New Finish, LLC

New Finish, LLC is a shining example of small businesses priming the economic engine of Stanly County. The owners of New Finish were running

a very successful powder coating operation which they had started from scratch. The owners were being approached by several clients with a desire for “e-coating,” a wet paint process. This new coating process would allow them to expand their offerings and bring on additional equipment and people.

Stanly County EDC worked with New Finish to secure a rehabilitation grant through the North Carolina Rural Center to help renovate a new location. Additionally, Stanly County EDC assisted in finding an SBA 504 lender in the county to work with New Finish to secure the necessary equipment. Today, New Finish has doubled their product offering and continues to hire new workers in Stanly County. Stanly County EDC is committed to working with clients to find creative solutions to problems and connect our companies to the region, state and world.
